PROFILE

Software engineer with 10+ years of native Android development, the last 7 as a Senior on automotive and mobility projects. Specialised in Kotlin, mobile app architecture and in-vehicle software integration; currently building software for Stellantis. I work with Jetpack Compose, Coroutines, Flow and Kotlin Multiplatform, applying clean architecture, code reviews and continuous quality to ship robust, maintainable products.

PROFESSIONAL EXPERIENCE

Senior Android Engineer

Jun 2024 — Present

Coremain · Stellantis project · Remote

Android software development for Stellantis vehicle platforms.

- Building native features in Kotlin with Jetpack Compose, Coroutines and Flow.
- Building with Kotlin Multiplatform to share logic across platforms.
- Integrating Android software into vehicle platforms.
- Continuous quality with TeamCity and SonarQube, code reviews and Jira tracking.

Kotlin KMP Compose Koin Coroutines TeamCity SonarQube

Senior Android Engineer

Mar 2023 — May 2024

SIVSA · Stellantis project · Remote

Android development for the Stellantis vehicle ecosystem, focused on device-to-vehicle connectivity.

- Implemented Bluetooth protocols for communication with vehicle platforms.
- Built and evolved Kotlin features on an MVVM architecture.

Bluetooth Kotlin MVVM Automotive

Senior Android Engineer

Oct 2019 — Feb 2023

SIVSA · OMNI project · Remote

Evolution and maintenance of the OMNI project Android app.

- Refactored complex architectures towards modern, maintainable patterns.
- Led code reviews and helped define team best practices.
- Managed integrations across CI/CD environments.

Kotlin Java CI/CD Code review

Android Developer

Mar 2016 — Jun 2019

zinkers.io · Pedreguer, Alicante

Sole Android developer on the team, owning the full lifecycle of several apps — from design to production.

- Implemented screens, user flows and features from designs and specs, with a focus on performance.
- Google Play publishing: store listings, releases and updates.
- Quality control and proactive bug fixing with Crashlytics.

Kotlin Java MVP MVVM Dagger 2 Firebase

TECH STACK

Languages

Kotlin, Java, Dart

Android

Jetpack Compose, Coroutines, Flow, Room, Hilt, Koin, Dagger 2, Retrofit, Ktor, RxJava, Bluetooth

Cross-platform

Kotlin Multiplatform, Flutter

Architecture

MVVM, MVP, Clean Code

Quality & CI/CD

Gradle, Git, TeamCity, SonarQube, Jira, Firebase, Crashlytics

AI in my workflow

Claude, GitHub Copilot, Gemini

LANGUAGES

Spanish

Native

English

Limited working proficiency

Also Galician and Catalan.

EDUCATION

Higher Diploma in Cross-Platform Application Development (DAM)

IES Número 1 · 2013 — 2015

Higher Diploma in Networked Computer Systems Administration (ASIR)

IES Pere Maria Orts i Bosch · 2011 — 2013

Diploma in Electrical Equipment and Installations

IES Maria Ibars · 2008 — 2011

CERTIFICATIONS

Clean Code training

Fundae · 2020

Android: Introduction to Programming (verified)

edX

Git, version control

Clúster TIC Galicia

CCNA Exploration (3 modules)

Cisco · 2012

Incomar Informática · Dénia, Alicante

Native Android app to manage expenses for a taxi fleet, backed by JSON web services with PHP and MySQL.

Java PHP MySQL REST

■ SELECTED PROJECTS

Mercurio

Personal · 2018 — Present

Information app for the Mercurio vocational training centre. First built natively in Kotlin with Android Jetpack (MVVM, ViewModel, LiveData, Navigation) and Dagger 2, then migrated to Flutter/Dart. Content managed in Firebase (Firestore and Storage), monitored with Crashlytics.

Kotlin Flutter MVVM Firestore Dagger 2

SmartStation

zinkers.io · 2018 — 2019

White-label platform for fuel station management. A single codebase using Gradle product flavors to generate a customised app per client; Dianaok was the first client app.

Android Gradle flavors White-label

Padeltrack

zinkers.io · 2016 — 2019

Padel match organiser. I took over a project started in 2013: upgraded it to 2016 Android versions, completed its development and drove its evolution. Real-time communication with Socket.io, Glide, Analytics and Crashlytics; client follow-up via Trello.

Java Socket.io Glide Analytics

Stylo

zinkers.io · 2017

Marketplace for beauty businesses. Kotlin Android app (MVP, Dagger 2, Retrofit 2, Glide) built in coordination with the back-end, iOS and design teams through Trello, Slack and InVision.

Kotlin MVP Dagger 2 Retrofit

Solidalis

zinkers.io · 2017 — 2018

Built the Kotlin Android app with an MVP architecture and Dagger 2, REST API integration via Retrofit 2, Firebase, and Crashlytics for production quality control.

Kotlin MVP Dagger 2 Retrofit Crashlytics

IOBI Cloud

zinkers.io · 2017 — 2019

App to monitor the machines and processes of the IOBI Cloud platform from a phone. Native Java client that embeds the platform through a WebView, with Retrofit 2 and Butterknife.

Java WebView Retrofit Butterknife

Istobal

zinkers.io · 2019

Corrective and evolutionary maintenance of Istobal's Android app: issue resolution, updates and production stability.

Android

LaLiga Fantasy MARCA

zinkers.io · 2016 — 2017

Fantasy football game for LaLiga and MARCA, my first professional app. Owned development, release and maintenance: networking with OkHttp 3, images with Picasso, monetisation with Google Mobile Ads, deep linking with Branch and Crashlytics.

Java OkHttp Picasso Mobile Ads Branch

Haulap

zinkers.io · 2018

Kotlin Android app on MVVM with Android Jetpack (ViewModel, LiveData, Room, Navigation and WorkManager for background work). Reactive programming with RxJava, networking with Retrofit 2, dependency injection with Dagger 2, Firebase and Crashlytics.

Kotlin MVVM Room WorkManager RxJava Dagger 2

Bingo Falomir

zinkers.io · 2017 — 2019

Companion app for the Falomir bingo in Kotlin with MVP, Dagger 2, Firebase and Crashlytics. Development coordinated with the iOS and design teams through Trello, Slack and InVision.

Kotlin MVP Dagger 2 Firebase

Vouzzer

zinkers.io · 2018

Kotlin Android app with an MVP architecture. Dependency injection with Dagger 2, REST APIs via Retrofit 2, image loading with Glide, Firebase services and crash monitoring with Crashlytics.

Kotlin MVP Dagger 2 Retrofit Glide

The Here Gallery

zinkers.io · 2017

Marketplace for selling paintings. Kotlin Android app with MVP and Dagger 2, Retrofit 2 for the REST API, Glide for image loading, Firebase and Crashlytics.

Kotlin MVP Retrofit Glide

Bliver

zinkers.io · 2019

Event creation and management app. Built the Android client on top of a Firebase back end.

Android Firebase

Trivial La Última y Apago

Education · 2015

Final-year project (DAM): trivia app for the La Última y Apago podcast. Java Android client with SQLite for local data and a custom PHP and MySQL back end.

Java SQLite PHP MySQL
